

MASTERCLASS WORKBOOK

FORMULATION IS
**FUN, EASY &
EMPOWERING**

WELCOME TO FORMULA BOTANICA

We are the leading online teaching institution for organic formulation and indie beauty entrepreneurship and we are on a mission to teach the world to formulate. We empower our students with the skills to change their lives through organic skincare and haircare. Formulating organic cosmetics with plants, flowers and herbs is an amazing, empowering skill that everyone can learn. Let us teach you how to become a formulator.

KEY FACTS

We have over **14,000** students and graduates

We've taught in **179** countries around the world

We employ **40** staff in our accredited online school

We teach **9** award-winning online courses

We host **1** amazing CPD membership site to cover the latest trends

We are **accredited** by the UK's Open & Distance Learning Quality Council

 [@FORMULABOTANICA](https://www.instagram.com/formulabotanica) [#FORMULABOTANICA](https://www.instagram.com/formulabotanica)

**YOU'RE
GOING TO
LEARN TO
MAKE THIS
FACE CREAM!**

WELCOME TO YOUR MASTERCLASS SERIES

Our Organic Skincare Entrepreneur Masterclass will teach you how to become a formulator and how to start your own organic skincare business.

Your **Masterclass episodes** will be released one by one as a series and you can catch them from 9am EST / 2pm BST each day.

CALENDAR

SEPTEMBER 20	SEPTEMBER 21	SEPTEMBER 22	SEPTEMBER 23
Episode 1 Create your formulation philosophy	Episode 2 Prepare your formulation equipment	Episode 3 Formulate a natural emulsion (in minutes!)	Episode 4 How to choose botanicals
SEPTEMBER 24	SEPTEMBER 25	SEPTEMBER 26	SEPTEMBER 27
Episode 5 Make your emulsion botanical	Episode 6 How to choose your preservative	Episode 7 Preserve your emulsion naturally	Episode 8 Customise your natural emulsion
SEPTEMBER 28	SEPTEMBER 29	SEPTEMBER 30	OCTOBER 1
Episode 9 Make your skincare brand stand out	Live Webinar 6pm (BST) How to become an organic skincare entrepreneur		
OCTOBER 2	OCTOBER 3	OCTOBER 4	OCTOBER 5
			Masterclass series ends Entrepreneur Program enrolment closes

Make sure you:

LESSON 1

CREATE YOUR FORMULATION PHILOSOPHY

In this first episode, we teach you about the importance of your formulation philosophy and then help you develop yours. We want you to understand why you're doing what you're doing before you get started so complete the exercises with Lesson 1 once you've watched the full episode.

We also want you to view this task as the most important homework you'll do throughout the Masterclass series. It's even more important than the formulation work itself - that's why we're starting with it.

! *Fill in the table with the 3 definitions – shades of natural – we mention in the video.*

1. WHAT NATURAL MEANS TO YOU

Formula Botanica has redefined what natural means in cosmetics and our definition is now used widely across the beauty industry.

As a skincare formulator, it is up to you to determine what natural means to you. There is no right or wrong answer in this case, there is only a spectrum of what natural means and how you interpret this definition.

Some people will view a natural ingredient as being picked directly from nature and having undergone no chemical processing, whereas others take a more pragmatic view and are happy to accept some chemical processing if they're going to use a naturally derived emulsifier or preservative.

Describe what they mean and add some examples of ingredients that fall into each category. Answer Y/N to whether you would accept the category in your formulations. Add another shade of natural if you think of one! There are nuances for you to discover and we only mentioned the main three in the video.

Shade of natural	My definition	Example ingredients	Would I use it? (Y/N)
1.			
2.			
3.			
Any other?			

2. YOUR PHILOSOPHY ON INGREDIENTS

Your choice of ingredients can be as highly individual as you are. Think of your ingredients both in terms of your formulation's efficacy and performance and also like your fingerprint - a unique choice that can set you apart from others in your niche. One of the first steps in defining your beauty brand will be to map out your ethos on ingredients. Answer the questions below to start thinking about your ingredient choices.

! *Print and fill in this page for each ingredient that is important to you.*

Name a specific ingredient you would like to use and where it comes from.
What does that ingredient mean to you and your story?
Under what conditions is it grown or harvested, and what is its ecological footprint?
What does it do for the skin and how?
How can it help the person who is using your formulation?
Why should your customers care about this ingredient?

3. YOUR PHILOSOPHY ON FORMULATION

You may be really keen to use a specific ingredient in a formulation or product range, but loving it, researching it, and knowing it inside out isn't a good enough reason to use it.

A balanced, effective formula that performs well, and even beyond customer expectations needs to be the sum of many parts and not rely only on a single ingredient. To think like a professional cosmetic formulator, you need to write a formulation brief before you start using your favourite ingredients. Understanding your 'why' is important as it guides your choice of ingredients and products. Ultimately, it helps define your brand.

These are big questions to think about. Have a go at them as they will be the first steps to defining your formulation philosophy and, ultimately, your future skincare brand.

Write down a type of product formulation you'd like to make, and if you wish, name some key ingredients you'd like to include.

--

What do you wish to achieve with this formulation?

--

Why is your formulation different?

--

How are you going to change your customer's life with it? What does it solve for them and how does it make them feel?

--

How does this formulation/product fit in with my overall brand & range philosophy? (This is a big question, but have a go!)

--

LESSON 2

PREPARE YOUR FORMULATION EQUIPMENT

Formulation is really easy. You don't need a lot of tools, particularly when you're starting out. You just need a small kit with the basics and that way you also save money when you make your first formulations. In this episode, we show you the simple pieces of equipment you need to become a formulator.

! Follow along with the episode and fill in the blanks to complete your equipment shopping list:

- Glass beakers in different sizes, e.g. 250ml, 100ml, 50ml, 10ml
- _____
- _____
- Jewellery scales
- pH strips
- _____
- Pipettes
- Mini homogeniser
- Lab book
- Gloves
- Apron
- Isopropyl alcohol 70%

Buy your equipment here:

-  Amazon UK
amazon.co.uk/shop/formulabotanica
-  Amazon US
amazon.com/shop/formulabotanica

LESSON 3

FORMULATE A NATURAL EMULSION

You've arrived at your first formulation lesson and we could not be more excited for you. Now that you know how to create your natural formulation philosophy and you know which tools you need to get started, in this lesson, you're going to learn how to make a natural lotion in a matter of minutes. Honestly, it's so easy, you can do this too.

Ingredient	Weight
Neroli hydrosol – INCI: <i>Citrus Aurantium Amara Flower Water</i>	
Sweet almond oil – INCI: <i>Prunus Amygdalus Dulcis Oil</i>	
Vegetal – INCI: <i>Cetearyl Alcohol (and) Cetearyl Glucoside</i>	
<i>More ingredients to be added in Lessons 5 and 7!</i>	

❗ **Your task is to fill in the blanks as you follow along with the episode and then have your own go at making the emulsion base.**

Remember that we weigh our ingredients, rather than use drops, because this method is more precise. You'll make this emulsion base botanical in Lesson 5 and then preserve it in Lesson 7, so you can also wait until then to make the whole formulation in one go.

 @FORMULABOTANICA #FORMULABOTANICA

Write down the exact method you followed to make the emulsion:

Write down your observations about the formulation process: (Did anything work particularly well? Did anything go wrong?)

Write down your thoughts on the emulsion's skin feel, texture and fragrance:

LESSON 4

HOW TO CHOOSE BOTANICALS

The dazzling array of plants available for use in skincare can make your head spin when you're first starting out. Many plants have huge benefits to offer to you and your skin - and they're so exciting to work with!

In this lesson, we'll cover the 5 main criteria you need to research when choosing botanical ingredients and then tomorrow, we'll put that into practise when we continue with our formulation and make it botanical. Once you've watched the episode, choose a plant that you're interested in and use our Formula Botanica Ingredient Research Form to undertake your own research.

Good places to research your plants include:

1. **The Lab at Formula Botanica** (formulabotanica.com/lab)
2. **Your supplier's website** and the technical documentation they provide
3. **The European Commission's CosIng directory** to find your INCI name (ec.europa.eu/growth/sectors/cosmetics/cosing_en)
4. **Knowde** - a free online tool to research ingredients available in the cosmetics sector (knowde.com)

RESEARCH FORM GUIDANCE

1. USE THE INCI TO SEARCH FOR AN INGREDIENT.

An ingredient can have many compounds and often suppliers use their own trade name.

For example:

INCI: *Benzyl Alcohol (and) Salicylic Acid (and) Glycerin (and) Sorbic Acid*

You can find this preservative under the following trading names:

- 🌿 Preservative Eco
- 🌿 Geogard ETC
- 🌿 Plantaserv M
- 🌿 Mikrokill ECT

Depending on where you live, the very same ingredient but with a different name will come up during your search.

2. CHECK WHAT FORM OF THE INGREDIENT YOU NEED OR YOU ARE INTERESTED IN.

You may want the powder version or you may prefer the glycerite extract (or other).

For example:

You would like to use Matcha tea in your emulsion. You can find the powder form but is that really the best choice for an emulsion? (Remember, this powder will not dissolve). So, you now either need to find the oil or the water-soluble version.

Alternatively, you can macerate it or infuse it depending on the compound you need from Matcha (you'll find many handy blog posts on maceration at formulabotanica.com/blog).

3. SOLUBILITY

Following on from the point above, think carefully about the solubility of the chosen ingredient. If you have only the CO₂ extract, what product can you use it in?

4. BUY IT AND TRY IT

This is possibly the most important step. You cannot use an ingredient just by reading about it. Purchase a small amount and try it in formulas.

- 🌿 Follow the suppliers' recommendations
- 🌿 Start simple
- 🌿 Adjust ratio and try again
- 🌿 Change one ingredient at a time to be able to identify differences, possible allergic reactions
- 🌿 Label properly, take notes and take photos
- 🌿 Observe and remember to take notes again. If you didn't write it down, it didn't happen.

RESEARCH CHECKLIST

In the episode, we covered five key points to research. These aren't the only aspects but make sure you think about them as you research your ingredients:

- INCI
- Solubility
- Dermal limit
- Chemical compounds
- Sustainability

INGREDIENT RESEARCH FORM

Use this form to record information on an ingredient. Print it out for each ingredient you research and file the sheets for reference.

1. KEY INGREDIENT DATA

Ingredient common name	
INCI	
Other trading names	
Recommended usage %	
Solubility	
Dermal limit	
Heat sensitivity	
Melting point	
pH range (if applicable)	
Restrictions / contraindications	
Other forms (tincture, powder, oil etc.)	
Suggested applications	

2. DESCRIPTION

Describe colour, aroma, skin-feel and other characteristics.

3. DIG DEEPER!

Certified (ECOCERT, COSMOS etc.)	
Compounds present	
Compatibility (what other ingredients could enhance its performance?)	
Historical notes / folklore	
Links to scientific articles, websites, blogs etc.	

4. YOUR NOTES

Give any extra details on the ingredient, such as the type of product it is suited to.	
	<p>INSERT A PHOTO OF THE INGREDIENT</p>

LESSON 5

MAKE YOUR EMULSION BOTANICAL

Ingredient	Weight
Lesson 3 emulsion base	94.5g
Sea buckthorn CO ₂ extract – INCI: <i>Hippophae Rhamnoides</i> Fruit Extract (and) <i>Rosmarinus Officinalis</i> (Rosemary) Leaf Extract	
Papaya glycerite – INCI: <i>Glycerin</i> (and) <i>Water</i> (and) <i>Carica Papaya</i> Fruit Extract	
Sweet orange essential oil – INCI: <i>Citrus Aurantium Dulcis</i> Peel Oil	
<i>More ingredients to be added in Lesson 7 when we'll preserve the emulsion!</i>	

You've now watched Lessons 3 and 5 so you'll have seen Lorraine make our very simple natural emulsion that's now packed full of antioxidant-rich botanical ingredients. We're nearly finished with the whole formulation, the only thing we have left to do is make sure it's safe.

- ! **Your task is to fill in the blanks as you follow along with the episode and then have your own go at making the emulsion base. You'll be preserving it in Lesson 7, so you can also wait until then to make the whole formulation in one go.**

 @FORMULABOTANICA #FORMULABOTANICA

Write down the exact method you followed when adding the botanical extracts to the emulsion:

Write down your observations about working with the extracts: (How well did they blend with the emulsion? Is there anything you would've done differently?)

Write down your thoughts on the formulation's skin feel, colour, texture and fragrance (what changed from the base you made in Lesson 3?)

LESSON 6

HOW TO CHOOSE PRESERVATIVES

Natural preservatives are a hot topic in the world of skincare. Various media and health scares over the last decade have seen people move away from traditional broad spectrum preservatives such as certain parabens. Nonetheless, if you are going to be an organic skincare formulator, you will need to understand preservatives, as you will often need to use them. So how do you choose the right natural preservative for your formulation?

❗ *Follow along with our lesson and as you're watching the episode, fill in the blanks to create your own natural preservative checklist.*

Your preservative should:

1. Be broad spectrum
2. _____
3. Not affect the fragrance
4. _____
5. Give you a good shelf life
6. _____
7. Be easy to use
8. _____

 @FORMULABOTANICA #FORMULABOTANICA

LESSON 7

PRESERVE YOUR EMULSION NATURALLY

Now that you've watched Lessons 3, 5 and 7, you'll know that we're very nearly finished with the whole formulation. The only thing we have left to do is make sure it's safe by preserving it.

- ! **Your task is to fill in the blanks as you follow along with the episode and then have your own go at making the complete formulation base. If you didn't follow along with Lessons 3 and 5, it's now time to make your complete antioxidant-rich botanical face cream.**

Ingredient	Weight
Lesson 5 botanical face cream	99g
Geogard ECT / Preservative Eco – INCI: <i>Benzyl Alcohol (and) Salicylic Acid (and) Glycerin (and) Sorbic Acid</i>	
Jar or bottle to package your formulation	

Write down the pH you measured in your emulsion before you add the preservative (did you have to adjust the pH? If so, what did you use to adjust the pH?):

Write down the exact method you followed to add the preservative:

Write down your observations about the formulation process: (How hard was it to measure the pH? Is there anything you would've done differently?)

Write down your thoughts on the finished antioxidant-rich botanical face cream: (What do you think of its finished texture, colour and fragrance? Has anything changed after adding the preservative?)

LESSON 8

CUSTOMISE YOUR NATURAL EMULSION

Welcome back to our formulation lab. You've now made your natural emulsion using our simple step by step process, incorporating gorgeous botanicals and preserving it naturally. But you might be wondering if you can substitute any of the ingredients in the formulation we made, so this lesson introduces you to a range of other oils, hydrosols, emulsifiers and extracts that might be suitable for your formulation lab instead.

! **Your task is to follow along with the episode and write down which ingredients you want to investigate first (and you can use our ingredients research form from Lesson 4 to do so!).**

Carrier oils we show you in Lesson 8:

- 🌿 Avocado oil – INCI: *Persea Gratissima Oil*
- 🌿 Carrot oil – INCI: *Daucus carota (and) Helianthus Annuus Seed Oil*
- 🌿 St John's Wort oil – INCI: *Hypericum perforatum (and) Helianthus Annuus Seed Oil*

Next carrier oil(s) I want to buy and try:

Hydrosols we show you in Lesson 8:

- 🌿 Rose hydrosol – INCI: *Rosa Damascena Flower Water*
- 🌿 Rose geranium hydrosol – INCI: *Pelargonium Graveolens Water*
- 🌿 Witch hazel distillate – INCI: *Hamamelis Virginiana Water*

Next hydrosol(s) I want to buy and try:

Emulsifiers we show you in Lesson 8:

- 🌿 Olivem 1000 – INCI: *Cetearyl Olivatate (and) Sorbitan Olivatate*
- 🌿 Polyaquol 2W – INCI: *Polyglyceryl-2-Stearate (and) Glyceryl Stearate (and) Stearyl Alcohol*

Next emulsifier(s) I want to buy and try:

Botanical extracts we show you in Lesson 8:

- 🌿 Rosehip CO2 extract – INCI: *Rosa Canina Seed Extract (and) Rosmarinus Officinalis (Rosemary) Leaf Extract*
- 🌿 Olive squalane – INCI: *Squalane*
- 🌿 Vitamin E – INCI: *Tocopherol*

Next botanical extract(s) I want to buy and try:

Essential oils we show you in Lesson 8:

- 🌿 Blue chamomile essential oil – INCI: *Matricaria Recutita Flower Oil*
- 🌿 Lavender essential oil – INCI: *Lavandula Angustifolia Flower Oil*

Next essential oil(s) I want to buy and try:

Alternative natural preservatives you might want to try:

- 🌿 Euxyl® K903 – INCI: *Benzyl Alcohol (and) Benzoic Acid (and) Dehydroacetic Acid (and) Tocopherol*
- 🌿 Geogard® 221 – INCI: *Dehydroacetic Acid (and) Benzyl Alcohol*
- 🌿 Lexgard Natural MB – INCI: *Glyceryl Caprylate (and) Glyceryl Undecylenate*
- 🌿 Dermosoft® 1388 eco – INCI: *Glycerin (and) Aqua (and) Sodium Levulinate (and) Sodium Anisate (will require a booster)*

Next preservative(s) I want to buy and try:

LESSON 9

MAKE YOUR SKINCARE BRAND STAND OUT

You've reached the final lesson in your free Masterclass, before we invite you to join our live webinar where we'll show you how to become an organic skincare entrepreneur. In this episode, we introduce you to 5 of the 8 different (and exciting!) niches that you could consider for your future organic skincare brand.

! *Your task is to follow along with the episode and complete your homework by filling in the form below, which will help you create the blueprint for your future life-changing beauty brand.*

Which of the 5 niches we covered appeals to you most and why?

What type of formulations would fit well with this niche?

Write down any initial ideas for your organic skincare brand and any inspiration you got after seeing some of the Formula Botanica graduates.

LIST OF PREFERRED GLOBAL SUPPLIERS

Thank you for taking part in this free Formula Botanica Organic Skincare Entrepreneur Masterclass. Every year, more than 80,000 people take part in this online training with the dream of becoming a formulator and we know that this can be life-changing for you too!

We hope you enjoy the lessons and bonus Facebook community. Throughout the Masterclass Lessons, you've watched us create a beautiful antioxidant-rich botanical face cream, which we'll teach you to make for yourself. By the end of Lesson 7, once you've watched all of the formulation lessons, we'll email you the full formulation with ingredients, INCI names and weights.

One of the main questions we receive throughout this Masterclass is "where can I buy ingredients and equipment?". We've compiled a list of our and our students' favourite suppliers around the world in this bonus supplier guide. Many of these suppliers ship globally.

Keep in mind that not every supplier will stock every single ingredient (unfortunately buying ingredients is not like going to the supermarket!), so you may need to shop around. If your chosen supplier is out of stock of the ingredients, then just try a different ingredient that appeals to you by following Lesson 8, follow the supplier's usage recommendation and chat to us during our live Q&As to find out if there are any restrictions. Know of a brilliant supplier who you think your fellow Masterclass students should know about? Post up your recommendations in our Facebook group and inspire your fellow formulators!

YOUR NEXT STEP:

ENROL FOR THE INTERNATIONAL ORGANIC SKINCARE ENTREPRENEUR PROGRAM

You have now completed the Masterclass and we hope you're excited about the potential of launching your organic skincare brand one day.

Everyone can formulate - and you can too.

We now want to introduce you to the roadmap that will take you from Masterclass attendee to becoming a formulator and organic skincare entrepreneur.

Formula Botanica's International Organic Skincare Entrepreneur Program will teach you everything you need to know in order to go from complete beginner to expert organic skincare formulator and entrepreneur.

By the end of this program, you could have your own successful organic skincare business.

This career-boosting program is aimed at people who want to take that all-important step towards setting up the business of their dreams and changing their life by creating their own high performance organic skincare range.

The global organic skincare industry is growing year upon year as more people demand top quality natural skincare and start to question the ingredients in mainstream cosmetics.

Become an organic skincare entrepreneur with our expert training. Our flagship program opens for enrolment on September 29th 2021 and closes again on October 5th 2021.

FORMULA BOTANICA MASTERCLASS WORKBOOK

THE INTERNATIONAL ORGANIC SKINCARE ENTREPRENEUR PROGRAM CONTAINS 6 OF OUR AWARD-WINNING ONLINE COURSES:
